

Original Title: "Take Me Out" (Franz Ferdinand)

So if you're GUT scale  
You know I'm here waiting for you  
I'm just a  $Z_2$   
I'm just a fixed point of you  
If you mod me out  
You will be broken, chiral you lie  
I'm just a  $Z_2$   
I'm just a phase of  $i$  times  $\text{Pi}$ .

I know I will be leaving you REDUCED. (instrumental)

I say don't you know?  
You say you don't go  
I say... MOD me out!

A T-duality  
Brings you to type IIB  
I want you ... to MOD me out! (instrumental)

Exotics – they don't show  
Proton decays slow  
I say ... MOD me out!

SUSY, we'll give it a try  
For couplings to unify  
LHC ... will bring it out! (bridge)

I know I will be leaving you (x 3)  
I know I will be leaving you REDUCED. (instrumental)

I say don't you know?  
You say you don't know  
I say... MOD me out!

You want  $\text{SU}(3)$   
And three families  
I want you ... to MOD me out!

Breaking symmetry  
Here at PiTP  
It's fun ... so MOD me out! (instrumental + bridge)

I know I will be leaving you (x 3)  
I know I will be leaving you REDUCED. (instrumental)
